

Protect walls and doorways from damage...

use Coldshield's innovative **Bollards** and BumpRail

## **Bollards** and BumpRail

 **coldshield**

From our extensive knowledge in commercial doorway design and construction, Coldshield has researched the best possible protection for doorway entrances in the retail, warehousing, medical and food industries. Our research revealed that the number one requirement from our customers was to develop a safe and easy way of protecting walls and doorways from trolley traffic damage. The results of this innovative research are now available for you to discover.

Coldshield **Bollards** and BumpRail are manufactured from plastics that are proven to be superior to traditional timber and aluminium bump rails or lightly constructed metal bollards.

Both these products are easy to install, safe for you and your staff, proven by extensive testing and are in stock now.

# Bollards

Traditional metal bollards do not absorb the impact.

**IMPACT**

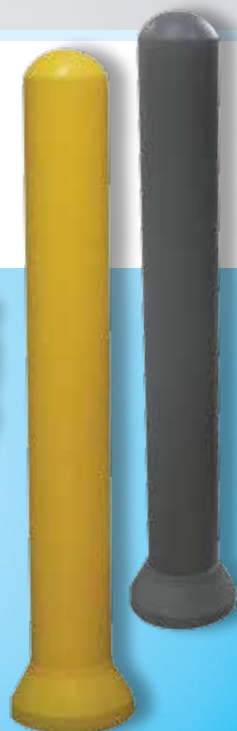

**FULLY RECOVERED AFTER IMPACT**

Coldshield's moulded Bollards absorb the impact and save you costly repair bills.

# BumpRail

BumpRail ensure the door frame or wall will not be damaged.
